Skills

Web Technologies

HTML, CSS, JavaScript, NodeJS, ReactJS, TypeScript, Redux Toolkit

Web Database

MongoDB, PostgreSQL, MySQL

Web Framework

ExpressJS, NextJS, NestJS, Tailwind CSS

Tools

VS Code, Github, Microsoft Office, Postman, Chrome DevTools, Docker, Jest, Cloudinary, Neon

Hobbies & Interests

Personal

Problem Solving, Competitive Programming, Gaming

Learning

System Design, AI & Machine Learning, Tech Blogging

Lifestyle

Traveling, Coffee & Coding, Music

Tech & Dev

API Design, Database Architecture

Languages

Bangla

Full professional proficiency

English

Working professional proficiency

Backend-focused full-stack developer - designing REST APIs, structuring PostgreSQL and MongoDB databases, and writing server-side logic that is clean, efficient, and built to scale. On the frontend, I build interfaces with React that are fast, clean, responsive, and easy to maintain.

- I care deeply about how systems are architected - not just whether the code works, but whether it will hold up as the product grows.
- I approach every project with consistency and ownership.
- I don't just write features - I think about the full picture, from database schema to user experience.

Education

Bangladesh Army University of Engineering & Technology (BAUET) Bachelor of Science • CGPA 3.22
March 2020 - June 2024

Information & Communication Engineering

- Focused on core Computer Science fundamentals with hands-on experience in web & mobile app development, software design, and collaborative project work.

Experience

Summit Communications Limited

18 Kawran Bazar Rd, Dhaka 1215

Internship

May 2023 - June 2023

- I worked at Scomm as an intern in the ESS & BSS under the IT department. They taught me how to build software architecture in a corporate office.

Generic Software

Fatulla, Narayanganj.

Junior Web Developer

December 2024 - April 2025

- Developed a full-featured Coaching Management System to manage students, courses, teachers, attendance, and results. Built responsive UI and integrated backend APIs using modern web technologies.

Projects

AI-Powered E-Commerce Platform & Admin Dashboard System

January 2026 - March 2026

1. Demo Login- Email: **dip.akand9899@gmail.com** | Password: **12341234**. Use this account to explore the admin dashboard and its full functionality.
2. Built a full-stack **AI-powered e-commerce platform** using the PERN stack with scalable REST APIs and JWT-based authentication.
3. Integrated **Google Gemini AI** for intelligent product search and implemented advanced filtering (price, rating, category, availability).
4. Developed a complete **admin dashboard** to manage products, categories, blogs, team members, users, and newsletters with full CRUD operations.
5. Implemented secure **authentication system** (login, forgot/reset password, protected routes) and built order tracking, contact management (new/viewed/replied status), and Stripe-based payment integration.
6. Integrated responsive UI using **React, Redux Toolkit, and Tailwind CSS** with optimized API communication.

Real Estate App & Admin Dashboard

October 2025 - November 2025

1. A MERN stack **real estate platform** featuring a property listings website for users and a robust admin dashboard for efficient property management.
2. Built with **React, Context API, and Tailwind CSS**, the app delivers a seamless experience for browsing, searching, and managing properties.

NextJS Admin Dashboard

August 2025 - September 2025

1. Built a scalable **admin dashboard using Next.js, React, and Tailwind CSS**, leveraging ShadCN UI for reusable and accessible component design.
2. Implemented advanced **data tables with TanStack Table** (sorting, filtering, pagination, row actions) and interactive charts using Recharts.
3. Developed a robust **form handling system using React Hook Form and Zod validation** for scalable and maintainable input workflows.
4. Designed a responsive layout with a **collapsible sidebar, dark mode, and modular UI components**, ensuring high-performance and a user-friendly experience.
